# Visage Software Update - March 2020
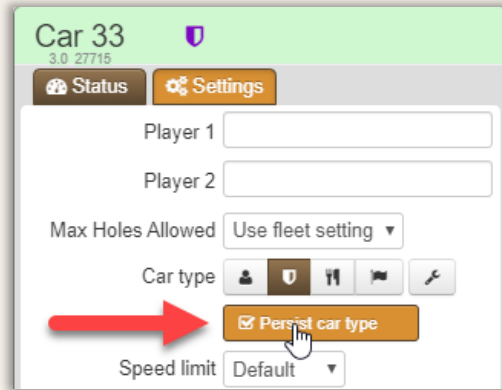

New Features and Enhancements

Language Prompt

- An optional language selection prompt prior to the round is now available.

Car Type

- An option to persist a non "normal" car type has been added to Car Settings.

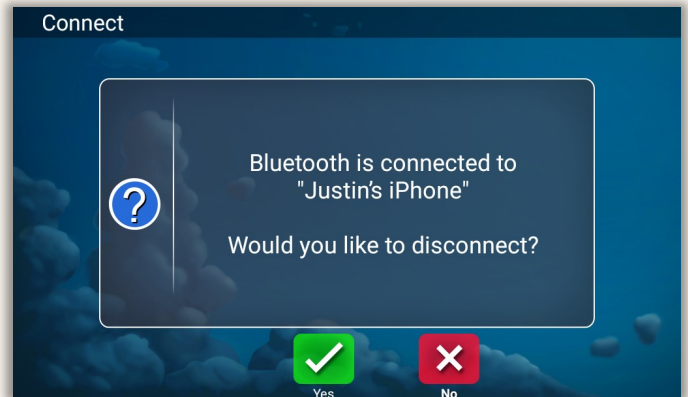

Language Selection - Settings

- Language selections can now be customized to show in any desired order.

Bluetooth® Disconnect Warning

- A dialog pop-up prevents accidental un-pairing of a Bluetooth device.

Additional Bug Fixes and Improvements

- Changes made to the F&B menu will now highlight the "Save menu changes" button.

- A .jpeg will automatically be converted to a .jpg when uploading to the Advertising Image Gallery.

- Gas cars equipped with the Gas Car Control Module will no longer display a battery state of charge value.

- The Out of Service car type screen can not be dismissed by touching the screen.

- Improved the performance of car history downloads.

Contact your Connected Account Manager for more information or feature implementation.
