

Release Notes

25.01.27

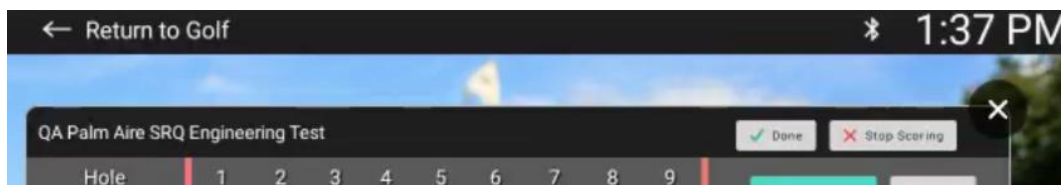

Nichols, David

- **Enhancements:**

- Option has been added to the welcome activity's menu.

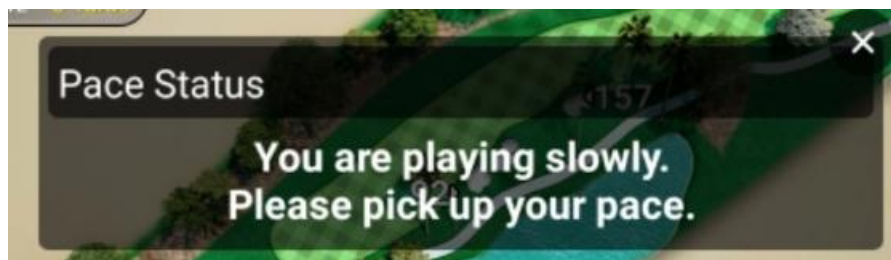

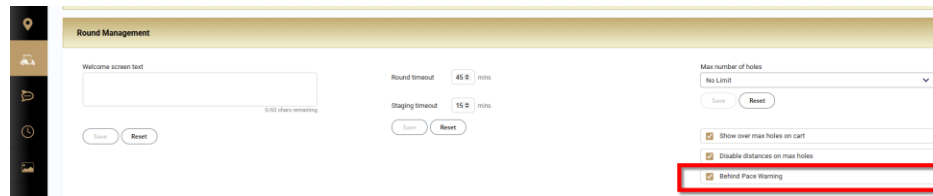

- Scorecard: [Stop sharing] button has been renamed [Stop Scoring]

- Behind Pace Enhancement (warning display & task bar coloring enhancement)

When the [Behind Pace Warning] checkbox in Round Management is marked, the system will present once the following warning to the golfer as soon as the pace gets behind. The warning needs to be dismissed manually.

The task bar activities and coloring timing have been enhanced as follows:

Pace was 5 sec > now is 15 sec

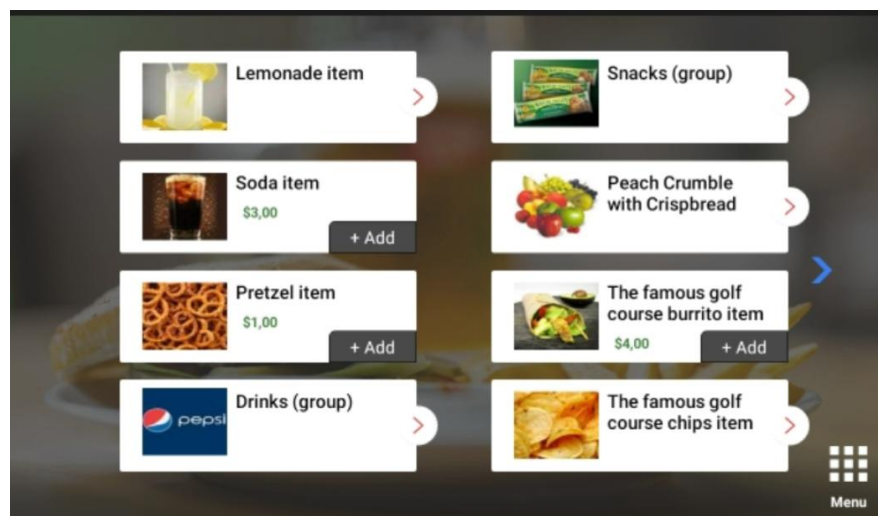

Day/Date was 3 sec > still is 3 sec (no change)

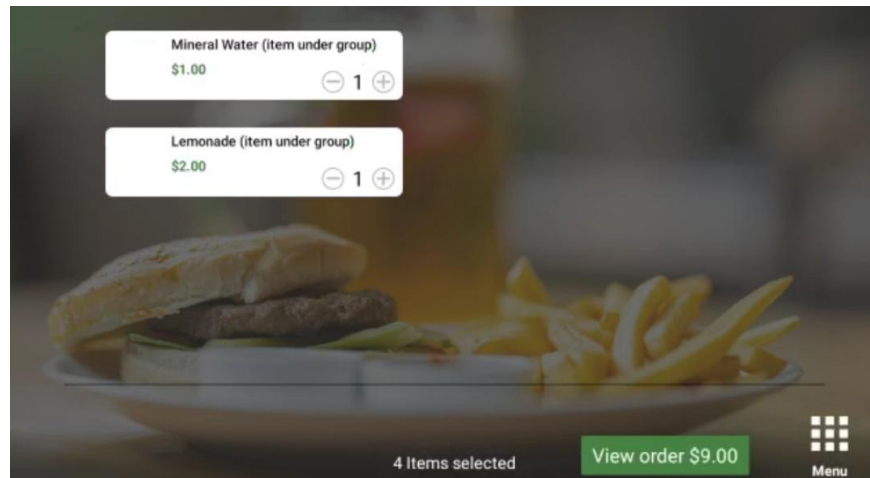

Hole/Par was 12 sec > now is 10 sec

- Bluetooth > Implement external device connection notification sound play.

VDU plays a notification sound during the pairing process. The sound will play when the pairing is authenticated with the passkey. *Note: on device reconnection without re-pairing the notification sound will not play.

- VDU>F&B> Enhancements on order button layouts for items within a group or without a group and price display.

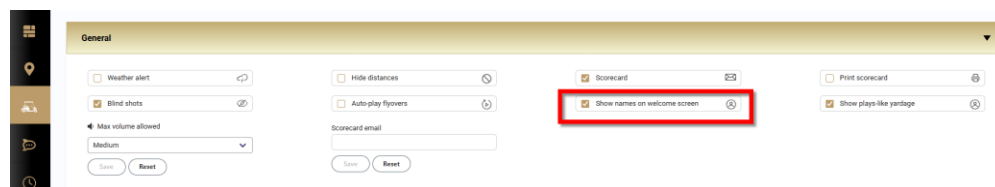

- VDU [Play like yardage] to work with VCC setting.

VCC Checkbox marked- Trident display:

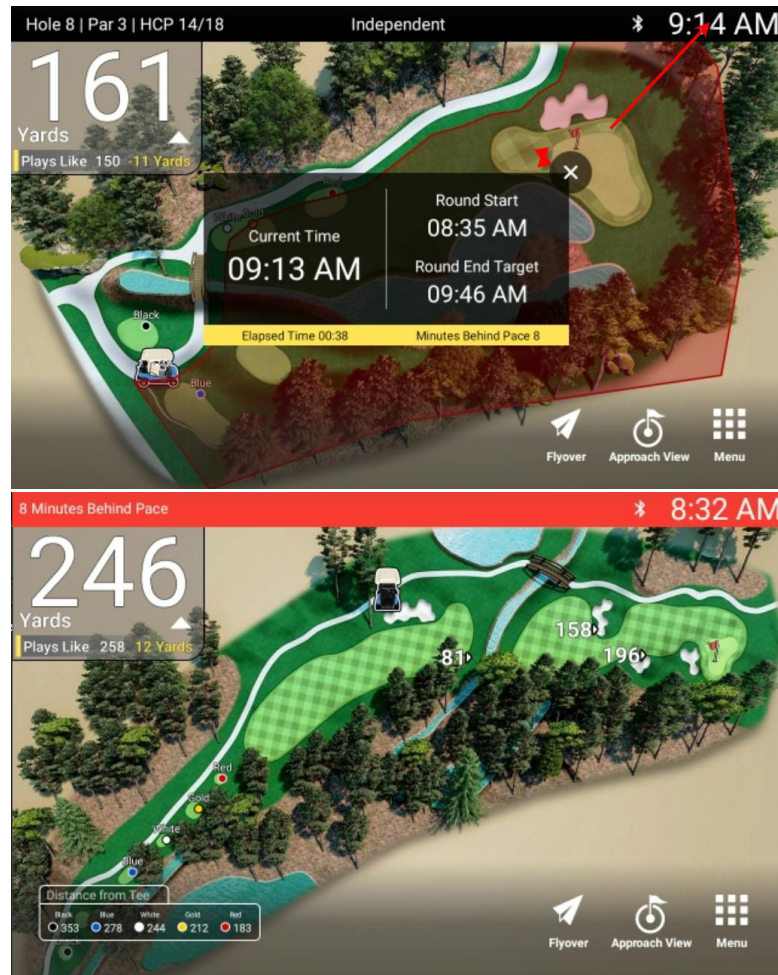

VCC Checkbox

- Taskbar time > Add pace status for the time window. Upon clicking on the time display on the upper right corner, the system presents a new pop-up window with the following information:
 - Round pace
 - On pace
 - Behind pace
 - Critically Behind pace
 - Round Start

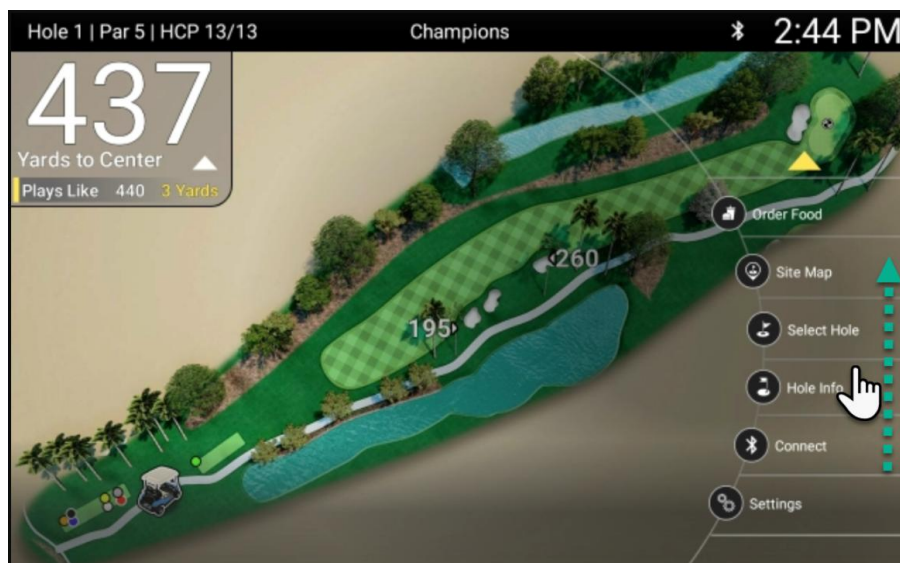

- Round End Target Pace note values are only obtained once the round is started

- Menu Carousel- Ability to manually swipe up and down.

Golfers have now the ability to manually swipe up and down the menu in addition to using up/down arrows.

- Car graphics adjust its direction based on the hole.

The car now travels in the direction of the hole. The car graphics have also been modified.

- Marshal Car > Special Needs cars will now display pace if behind with car number on the map page

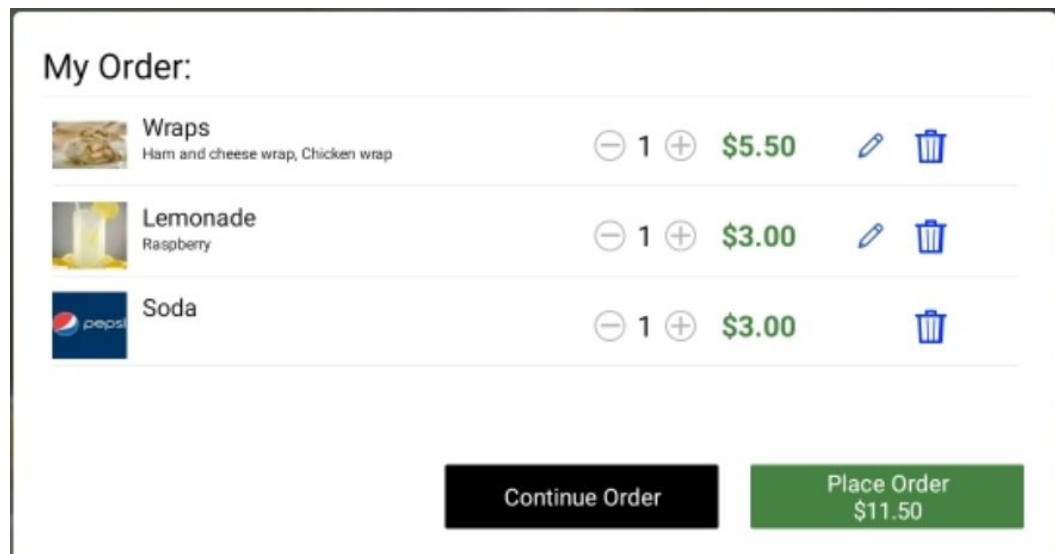

All non-marshall and non-beverage cars now have outlines and car numbers set to yellow or red when behind pace as appropriate.

- F&B > My Order > Implement edit functionality

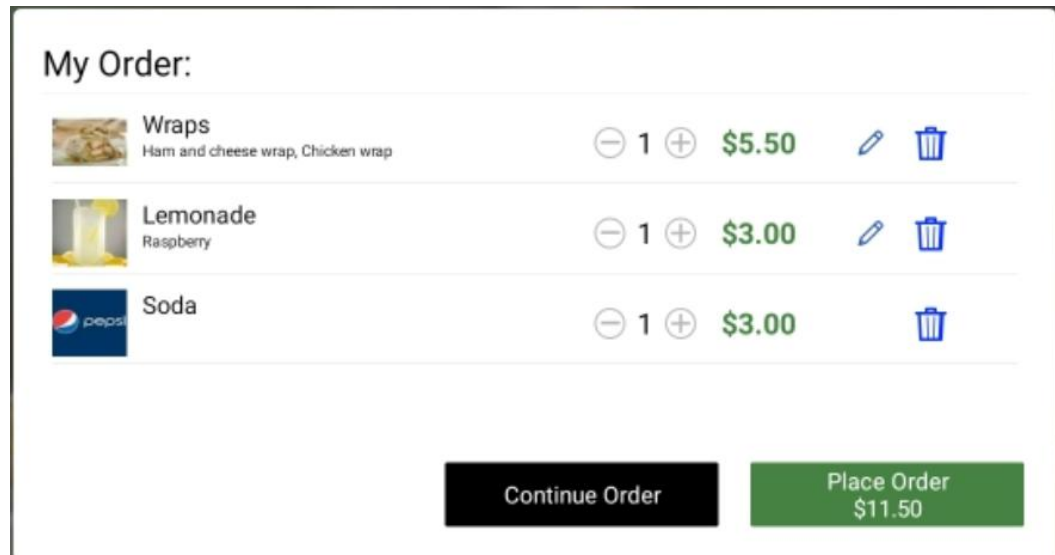

Edit button added to My Order screen for any item that has options.

- F&B > My Order > Implement delete functionality

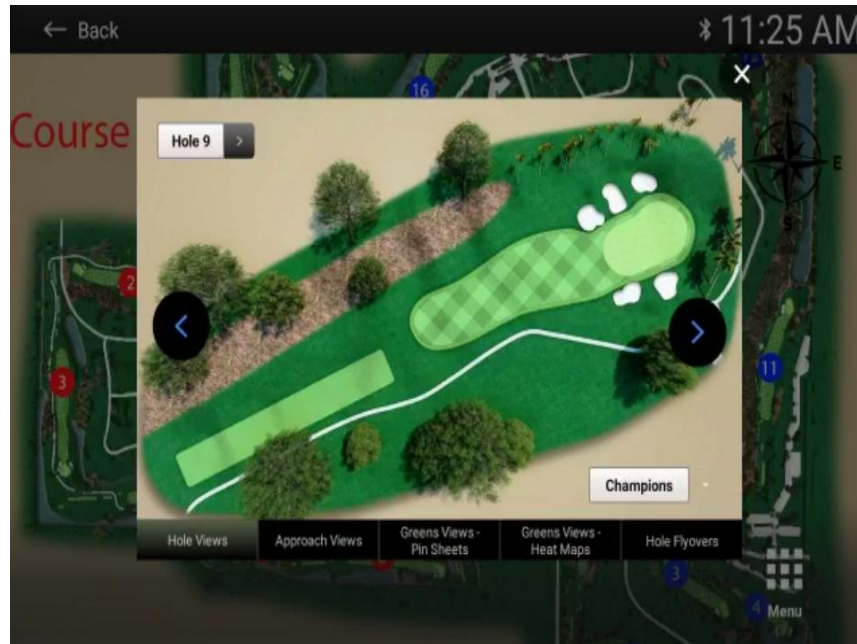

Delete button added for all separate items.

- Navigation- Ability to tap on green and be able to navigate.

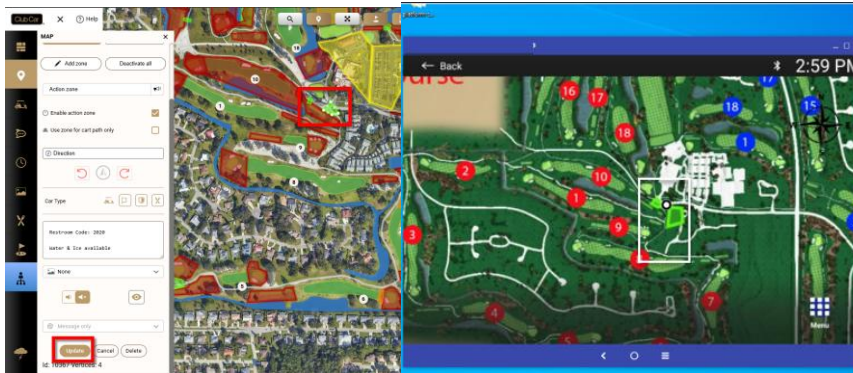

Users can tap on each hole on the site map to navigate to the Hole info screen of the selected hole.

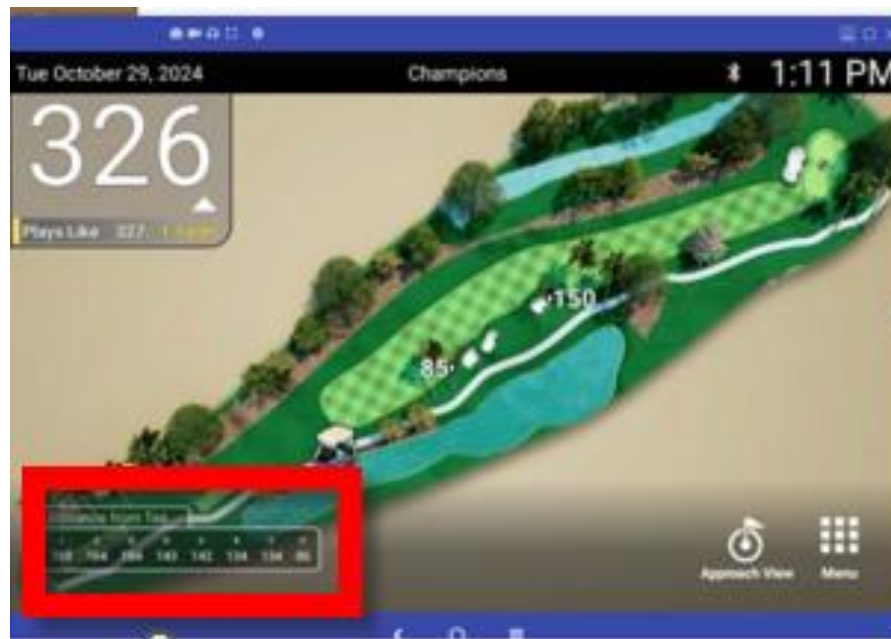

- Action Zones > Implement display of Action Zones for Sites with Car Control off

'Message only' Action Zones are displayed when Car Control is turned OFF in the VCC.

- Tee display enhancements - display colored dots, tee name or both based on set up in VCC.
V4UI areas affected:
 - ❖ Range screen tee markers
 - ❖ Range screen tee shot distances
 - ❖ Scorecard

Scorecard player popup tee markers now also show color, text, or both.

• Corrections:

• VDU

- Removed F&B car type selection from VDU, car type can be selected in the VCC
- When zoomed in would display inaccurate pin view distances.
- There was an issue when sometimes after a reboot, VDU would display UTC time versus local time.
- Improvements to the scorecard related to name and character limits
- Bluetooth - Audio would pause whenever a video was played (action zone, flyover, ad) and the streaming media playback would not resume automatically.
- F&B- Option under group item display the add button and arrow.
- Notification message missing when sending Scorecard after a round of golf.
- Marshal mode - Car number were not changing size when zooming.
- Touch-For-Distance start point was off. The line from the touch point to the end point is supposed to go to the car. However, the arc drew toward a start point off the screen.
- Blind Shot - unable to return to Golf after back to back blind shot.

There was a condition that would freeze the system. If the user did not dismiss the warning and played the hole, then the system would trigger on the next hole also a blind shot, and freeze the screen on the Blindshot warning.
