Quality Control, Power & Data Tool
QCPD tool*

is now available for order thru the Club Car Links Parts Store.

PN 47714420001

TO

Onward Dealers & Distributors

*The **Quality Control, Power & Data QCPD Tool** is a Club Car approved, certified, and tested tool designed for swift verification, and pinpointing accurately any inoperable or defective component in the Visage or Consumer Connect hardware product lines, ensuring the proper functionality of the equipment. This tool minimizes the uncertainty associated with determining which part needs replacement, thus preventing unnecessary trips and labor. The QCPD tool reduces downtime, saves dealer/distributor service time, and ultimately enhances customer satisfaction.*

Employing the QCPD tool at installation, prior to car delivery, to verify and address any identified issues acts as a preventive measure, avoiding the occurrence of serious or fatal damage to vehicle-sensitive electronics.

We recommend each Dealer or Distributor that sells, installs and services Visage on Fleets and/or Consumer Connect for Onward have one of these tools at each location.

Please reference the Black & Gold site for Club Car certification training. Search for training on Visage Hardware Installation & Testing: link below:

You will also need the V4 23 Pin adapter which will be shipped separately!!! Please email Arthur.Cadena@Clubcar.com He will arrange to have a free V4 23-pin adapter sent for every QCPD tool purchased.

Thank you for your business and continued support.

If you have any questions, please contact Wade.clary@clubcar.com; or Gerard.Johnson@clubcar.com or Arthur.Cadena@clubcar.com.

Please distribute this bulletin to all appropriate personnel at your location. All bulletins are available on [Club Car Links](#).
